## Abstract

1. This report documents the most recent input of ESSPIN to strengthen pupils' reading skills. A survey recently conducted in all ESSPIN supported states revealed that most schools' needs besides staff capacity building are textbooks and supplementary readers for both the teachers and the pupils. ESSPIN has commenced a partnership with World reader to provide e-readers to 20 schools in Kaduna and Lagos. The e-readers containing over 180 relevant books. The trial is being implemented through existing state structures and will be evaluated using a survey to assess reading habits and a reading assessment.

## Achievement of the Terms of Reference for ESSPIN School Improvement Specialist with respect to World Reader E-Reading Programme, Lagos, Dec 2015

<b>Tasks</b>	<b>Progress made and agreements reached</b>	<b>Proposed/agreed follow up</b>
Organising a weeklong WR workshop in Lagos on publishing, Kindle training, PM training, e-reader integration into teaching and learning, Lagos, Dec 2015.	Completed: Workshop organised, e-reader books reviewed	Checking and communicating with WR team and ESSPIN Lagos team on the necessary materials to put in place for the workshop
Attend WR workshop and join sessions to plan how these would be taken forward in both states (Lagos and Kaduna).	Completed: session attended, state plans shared (including sustainability).	Write up report as milestone deliverable for ESSPIN Q4 2015 (this document) and check with states to ensure their preparedness for January sessions and the surveys.

## Background

2. Schools in Nigeria have very few resources for pupils. States have requested a need for more textbooks, supplementary readers and lesson plans. Due to the limitation of funds, non-availability of research data to support the position that materials have direct impact on pupils' learning, and enormity of the task of delivering physical books to schools, considerations were given to e-reading programme, which would enable pupils to have access to a library of up to 200 books within one e-reader.
3. Given World reader's success in Ghana and Kenya, it was decided to trial the e-readers in a number of schools in Nigeria. World reader is able to leverage a substantial number of books through its relationships with partnerships and funding model which was seen as attractive.
4. In addition to trailing the e-readers, a monitoring and evaluation component was integrated from the outset. This will include a knowledge, attitudes and practices survey and an Early Grade Reading Assessment.
5. The e-reader trial will be completely integrated into the school support structures that have been set up and supported through ESSPIN, i.e. through SSITs and SSOs in school clusters. It was decided to undertake the trial in Lagos and Kaduna.
6. SUBEB officials from both states, SSIT members in charge of the cluster schools, ESSPIN team (both O2 and O3), ASU heads, O3 Lead Specialists and four people from WR were present at the initial workshop.

## Findings and Issues Arising

7. Appendix 1 gives details of the week-long training activities. The workshop was kicked off by ESSPIN, but led by World reader with contributions from the ESSPIN/SUBEB teams. The contributions were very valuable when it came to reviewing the suitability of the books to the contexts in which we work and in integrating the e-readers into teaching and learning. It was noticed that the list of books proposed by World reader included six books which may be considered controversial. It was decided to remove them.
8. The WR team demonstrated good understanding of how to use the e-readers during the technical training sessions and were able to successfully pass on these skills to those in attendance.
9. The SUBEB/ASU with ESSPIN support looked into sustaining the programme and steps to keep the devices safe, involving the community and rolling out into other schools in the states.

10. Appendix 2 shows photos of the participants and facilitators during the sessions

### Options and Next Steps

11. After the initial training sessions, the ESSPIN and SUBEB team swung into action to plan for the training of the CTs, HTs and the PMs. Decisions were led and taken by the SUBEB in selecting schools in 2 clusters of schools that are close to one another with a population of about 400 pupils per school. Plans were also made to carry out the baseline survey to have data about pupils' reading attitude and skills. The training for monitoring and evaluation is planned for early 2016. The KAP assessment will also attempt to measure the reading attitude of CTs, HTs and parents.
12. ESSPIN Lagos to be constantly reminded of clearing the shipped devices and the solar chargers.
13. States were also advised to build their own charging stations for all the e-readers and these should double as charging stations and as safes for the devices.
